Top Personal Projects :

❖ **Full-Stack Chat Room (Real-Time Messaging):**

- Built a real-time messaging platform using Django Channels & WebSockets.
- Implemented custom user auth, profile management, message editing/replying, and dynamic room creation.
- Used Redis & PostgreSQL for performance; deployed on Railway

https://github.com/ThadIAmir/Chatroom

❖ **Full-Stack Todo App:**

- Created a complete task management system with Django, PostgreSQL, and Bootstrap.
- Included user auth, full CRUD, responsive design, and clean project architecture.
- Deployed on Railway.

https://github.com/ThadIAmir/TODO

❖ **Company Portfolio Website (SPA):**

- Developed a single-page website for a railway brake system company.
- Features include dynamic contact form, responsive UI, admin dashboard, and full CMS capabilities.
- Deployed on PythonAnywhere.
